## DETAILED ACTION

## Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 2. Claims 1-4, 8, 9, 11, 12, 16 and 18 are rejected under 35 U.S.C. 102(b) as being anticipated by Ricci et al. (5164433).

Ricci teaches a thickener composition which may be used in drilling fluids, which comprises a latex, a surfactant, aluminum silicate and salts, such as calcium carbonate (see Table 1 and column 5, lines 56-59).

3. Claims 1-4, 8, 9, 11, 12, 16 and 18 are rejected under 35 U.S.C. 102(b) as being anticipated by Onan et al. (5346011).

Onan teaches a wellbore fluid which comprises a latex, aluminum silicate, a sodium alkyl sulfate surfactant, and a salt such as zinc oxide (see for example column 8, lines 37-61).

Applicants intended use as a drilling fluid does not distinguish (In re Pearson 181 USPQ 641).

Application/Control Number: 09/785842 Page 3

Art Unit: 1712

4. Claims 10, 14, 15 and 17 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

- 5. Claims 5, 7, 19-31 and 33-40 are allowable over the art of record.
- 6. Applicants arguments have been considered and are deemed fully persuasive. The rejection over Endres is withdrawn, since the coagulation occurs immediately upon addition of the aluminum sulphate, and the polymer would thus not be able to form a film on the subterranean formation. Applicant has argued that the references do not teach the property of being capable of forming a deformable film on the subterranean formation. The rejections over Ricci and Onan are maintained, since they utilize the same type of latex, and same precipitating agent as in the present invention, it is thus not clear why such latex would be capable of forming a film on the subterranean formation in the present invention, but incapable in the case of Onan and Ricci. The discovery of applicant that the composition is capable of forming a deformable film on the formation does not distinguish, since an inherent property in an old composition cannot distinguish over the prior art (In re Tomlinsin 150 USPQ 623).
- 7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Application/Control Number: 09/785842 Page 4

Art Unit: 1712

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Philip Tucker whose telephone number is (703) 308-0529. The examiner's normal working hours are 7:30am-4:00pm, Monday-Friday. If necessary SPE Robert Dawson may be contacted at 703-308-2340. For inquiries of a general nature call the receptionist at 703-308-0651. The group FAX no. is 703-872-9310. The **after final** fax no. Is 703-872-9311.
